SYNTHETIC DEMONSTRATION · NOT A REAL STUDY-AREA RESULT

01 · Flood intervention need

Synthetic study area / SYNTHETIC_EVENT

Map key

Classification

- Intervention screen · depth ≥ threshold
- Depth below threshold
- Unknown / NoData

READ THIS MAP

Depth at or above the registered threshold identifies local need. Unknown cells remain unknown.

Below-threshold source-control areas are retained for investigation. Thesis §§5.1, 5.5.1; user threshold.

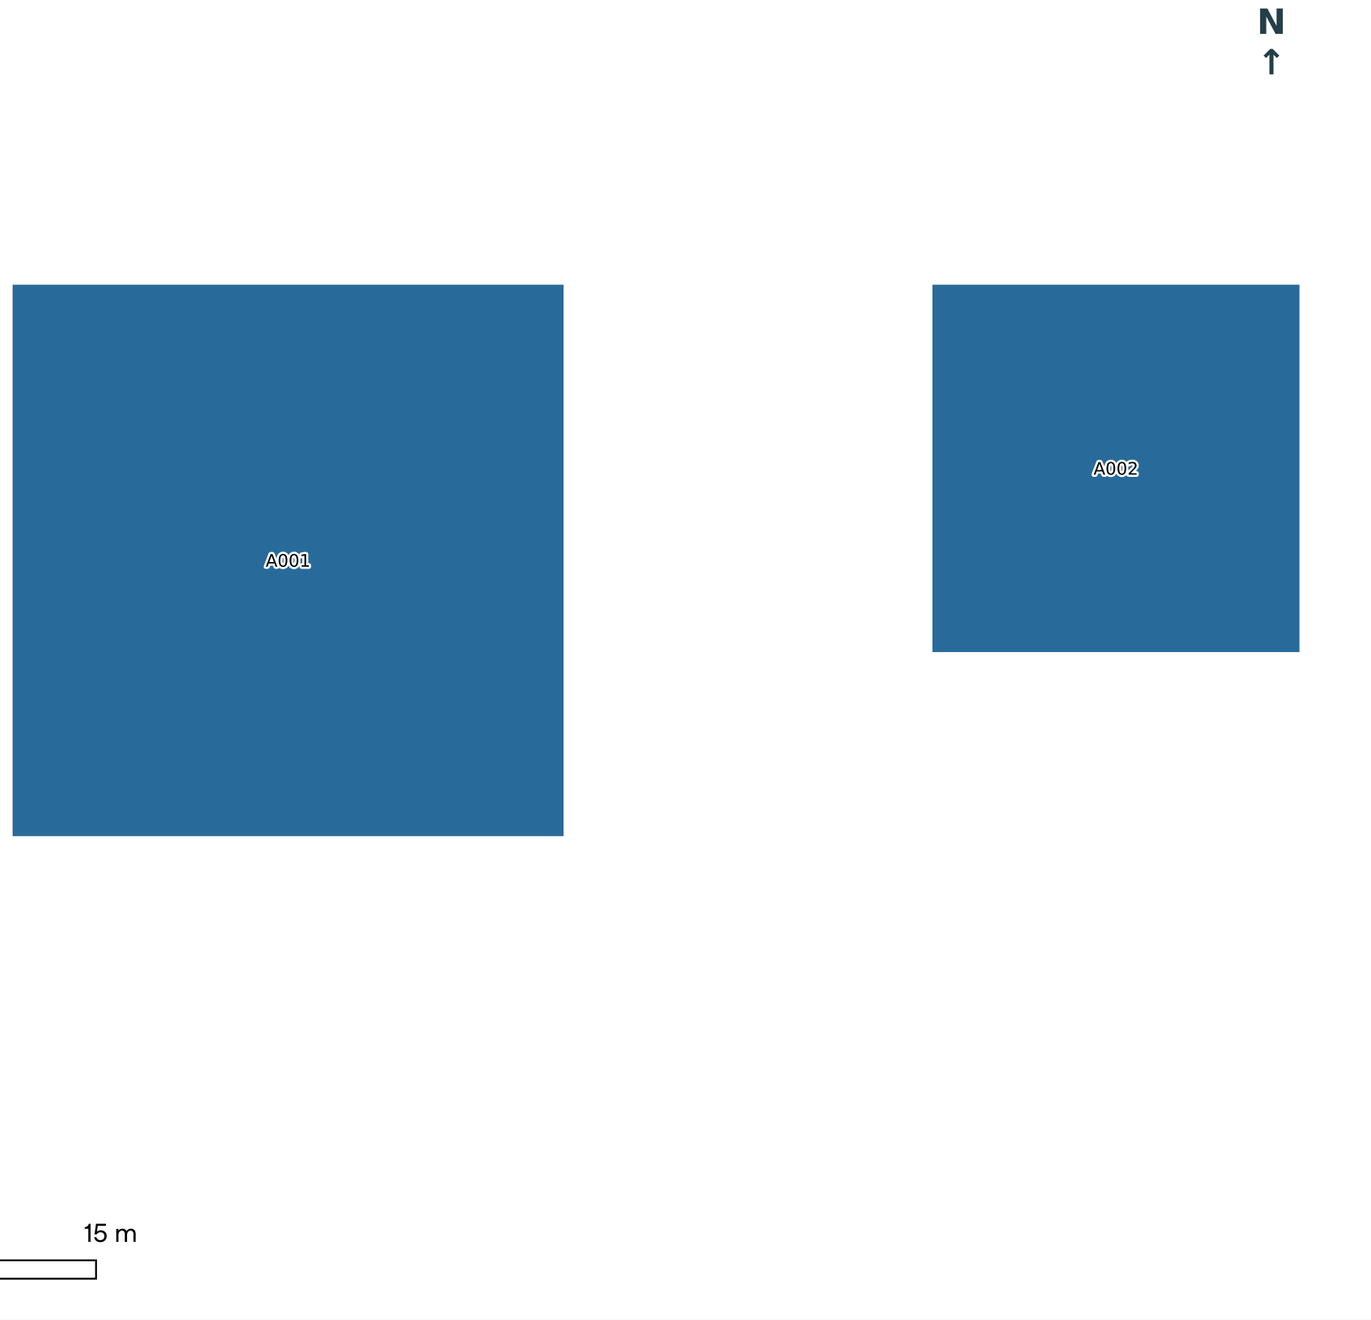

Scenario: SYNTHETIC_EVENT
Need threshold: ≥10 cm
Horizontal CRS: EPSG:32734
Grid: 10 × 10 m; source grid retained
Vertical datum: UNCONFIRMED
Rule profile: generic_unconfigured_v1
Run: DEMO_TRANSFERABLE_PLANNING
Source details: GeoPackage registers
Identify a feature for all rule decisions.

Synthetic inputs; all evidence and authority decisions are invented for software testing.

SYNTHETIC DEMONSTRATION · NOT A REAL STUDY-AREA RESULT

02 · Flood action areas

Synthetic study area / SYNTHETIC_EVENT

Map key

Classification

Flood action area · investigate

READ THIS MAP

Connected flood-need areas for planning discussion. A001 etc. follow depth, then area order.

Read ownership shares, heat overlap and next action on click. These are not design modules. No flood benefit is estimated.

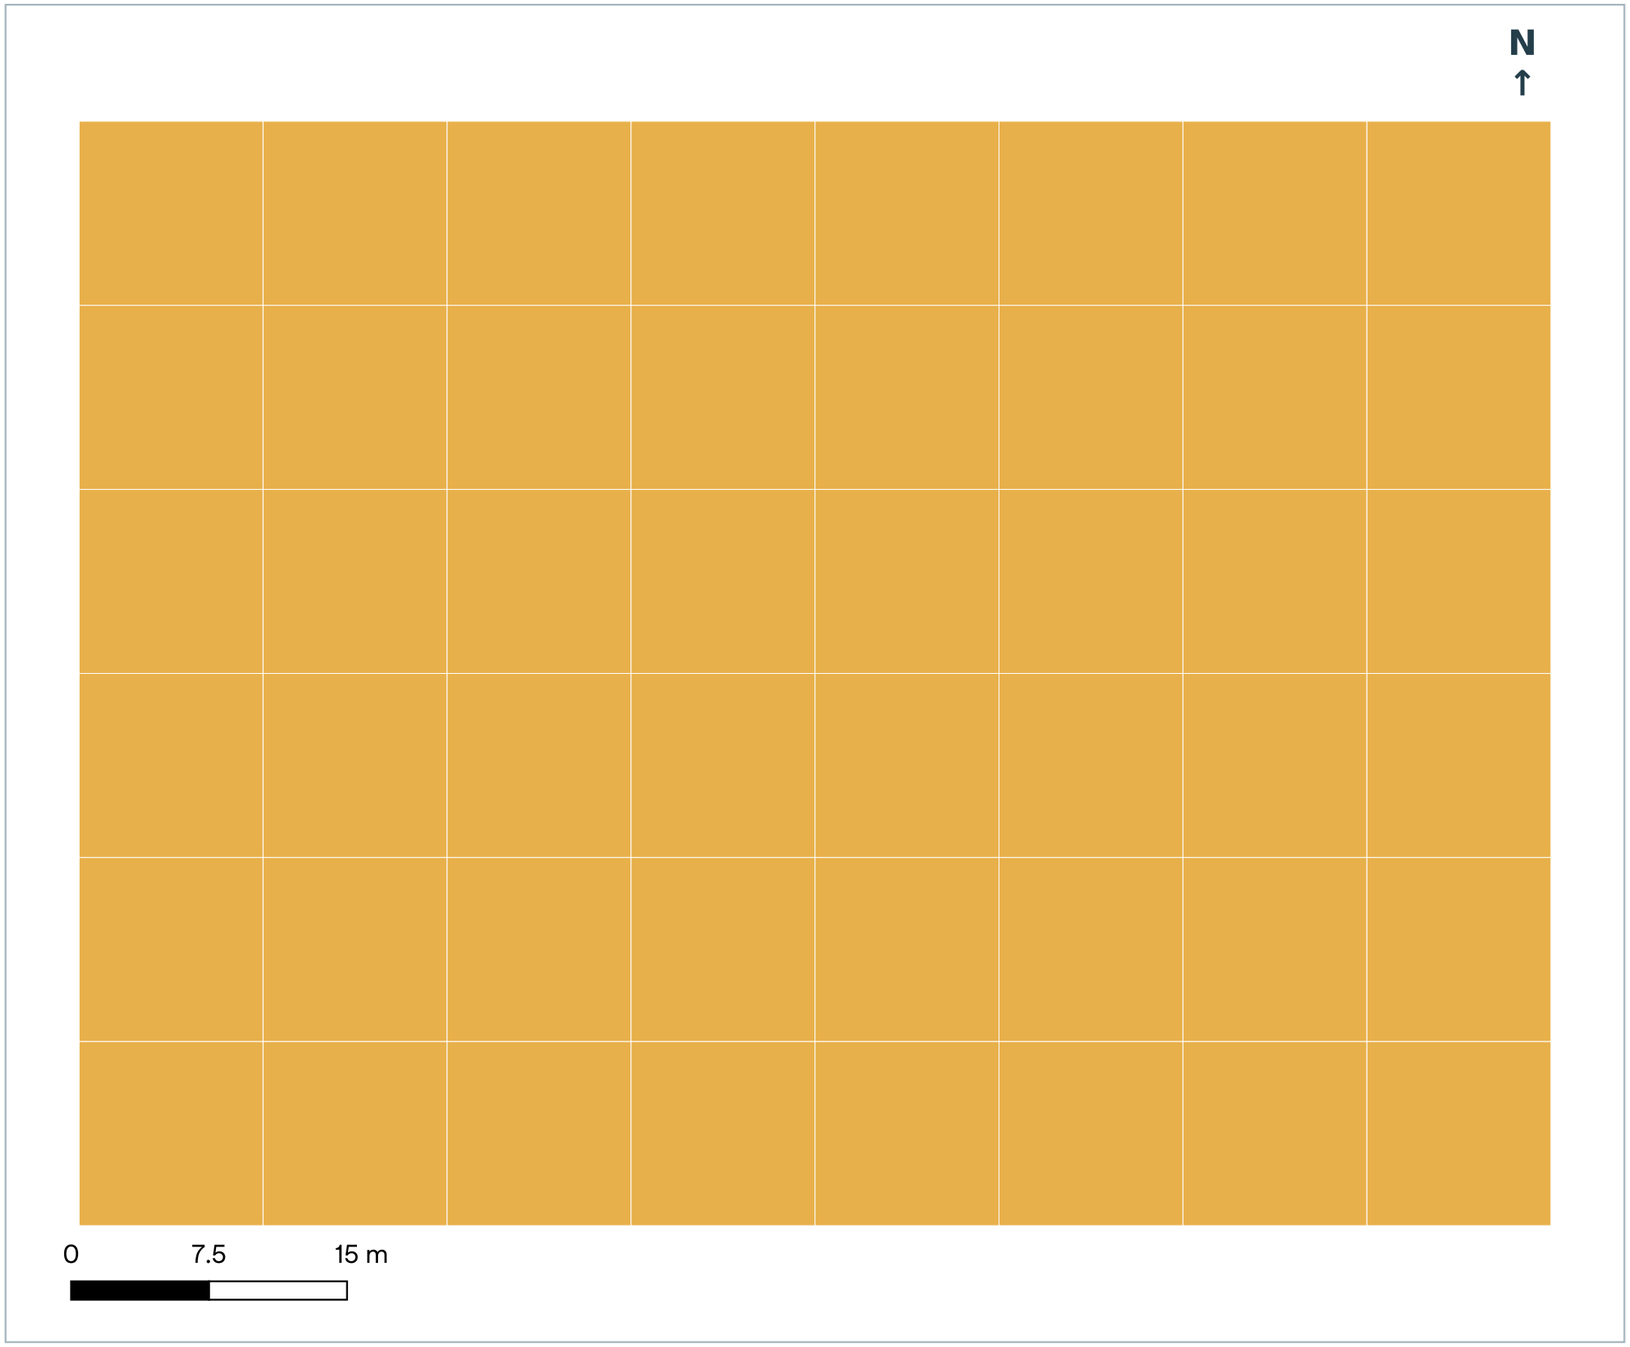

Scenario: SYNTHETIC_EVENT
Need threshold: ≥10 cm
Horizontal CRS: EPSG:32734
Grid: 10 × 10 m; source grid retained
Vertical datum: UNCONFIRMED
Rule profile: generic_unconfigured_v1
Run: DEMO_TRANSFERABLE_PLANNING
Source details: GeoPackage registers
Identify a feature for all rule decisions.

Synthetic inputs; all evidence and authority decisions are invented for software testing.

SYNTHETIC DEMONSTRATION · NOT A REAL STUDY-AREA RESULT

03 · Infiltration evidence and restrictions

Synthetic study area / SYNTHETIC_EVENT

Map key

Classification

Conditional · evidence / decision needed

READ THIS MAP

Known prohibitions block infiltration.
Missing evidence stays conditional.

Lined detention and controlled outlets remain separate concepts.
Final clearance needs module design.
Thesis §§5.4.2, 5.5.2; local profile.

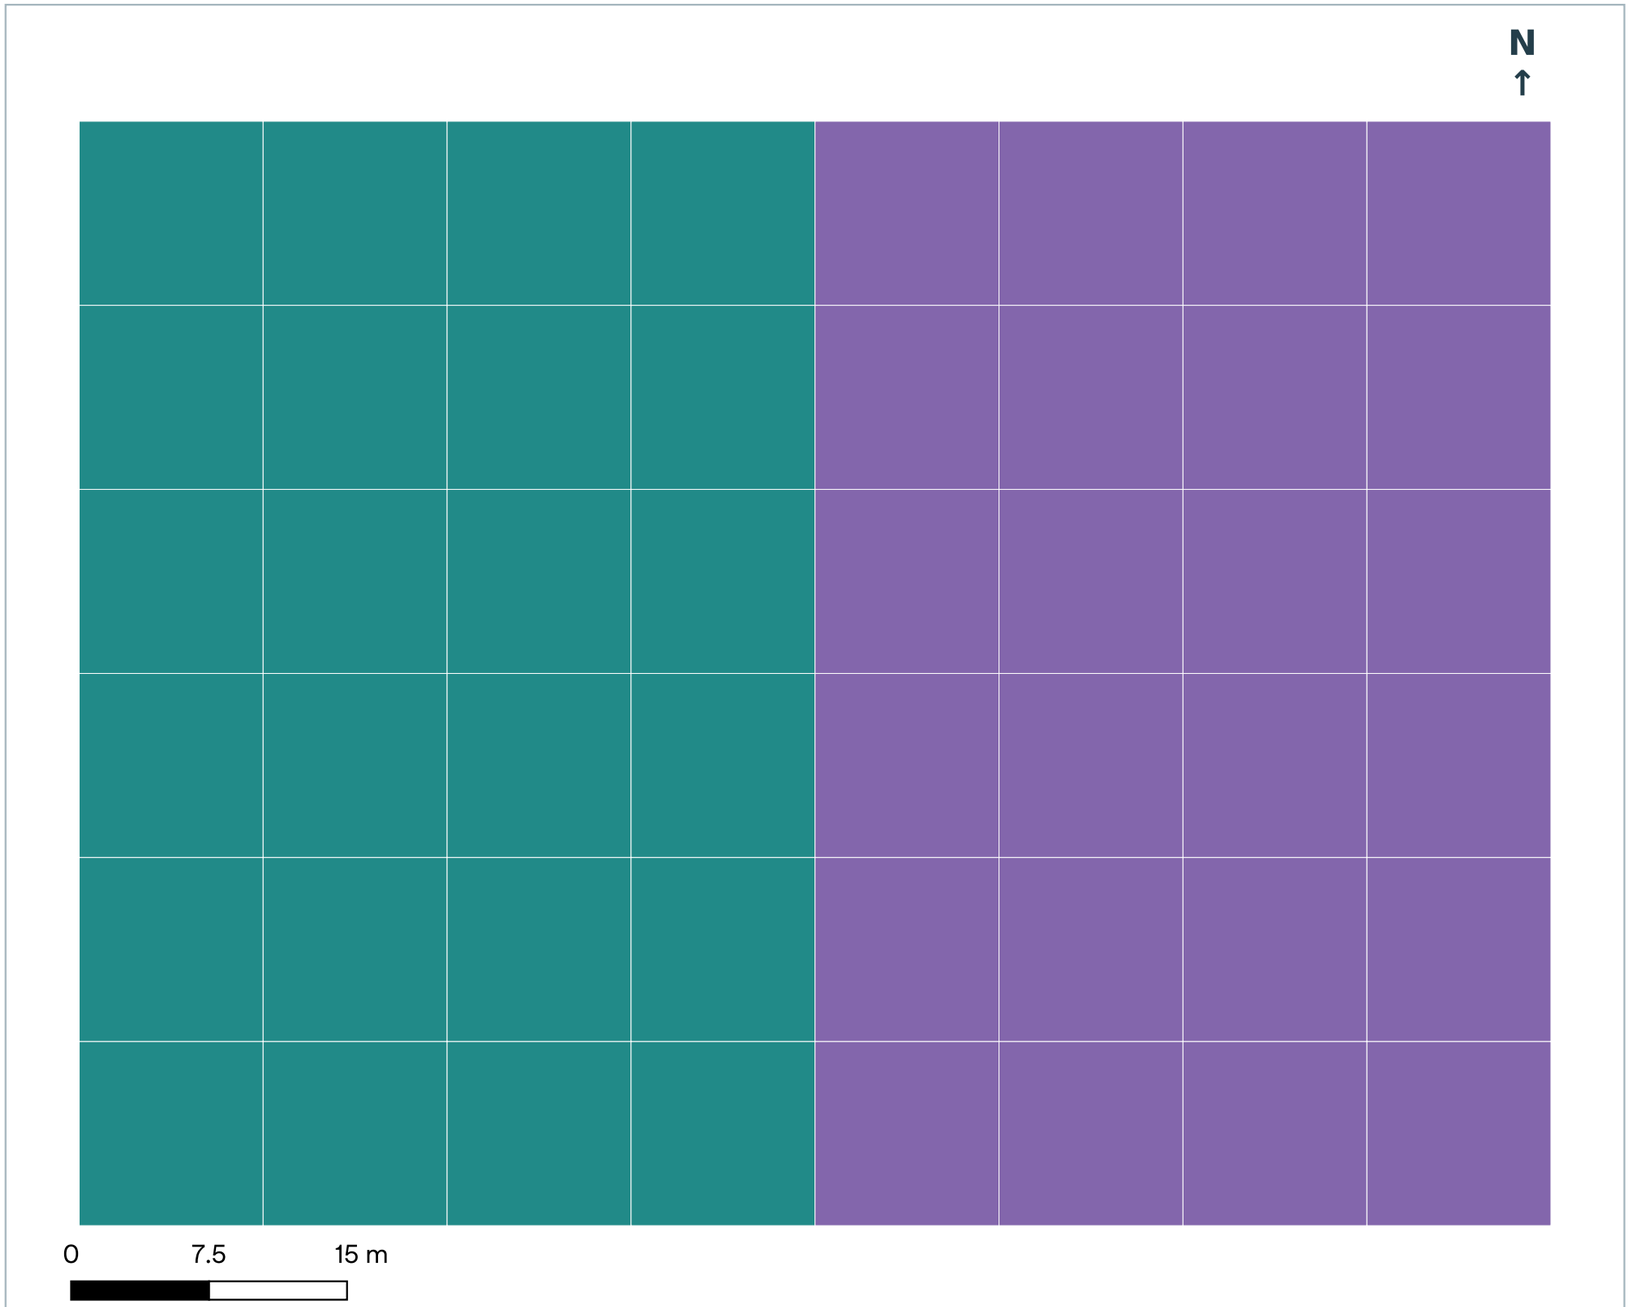

Scenario: SYNTHETIC_EVENT
Need threshold: ≥10 cm
Horizontal CRS: EPSG:32734
Grid: 10 × 10 m; source grid retained
Vertical datum: UNCONFIRMED
Rule profile: generic_unconfigured_v1
Run: DEMO_TRANSFERABLE_PLANNING
Source details: GeoPackage registers
Identify a feature for all rule decisions.

Synthetic inputs; all evidence and authority decisions are invented for software testing.

SYNTHETIC DEMONSTRATION · NOT A REAL STUDY-AREA RESULT

04 · Public and private delivery routes

Synthetic study area / SYNTHETIC_EVENT

Map key

Classification

- Municipal ownership
- Private ownership

READ THIS MAP

Exact polygon area shares.
Private land is a partnership route.
Unknown ownership is retained.

Public use is not proof of ownership.
Click a unit for the next action.
Thesis §§5.4.1, 5.5.4.

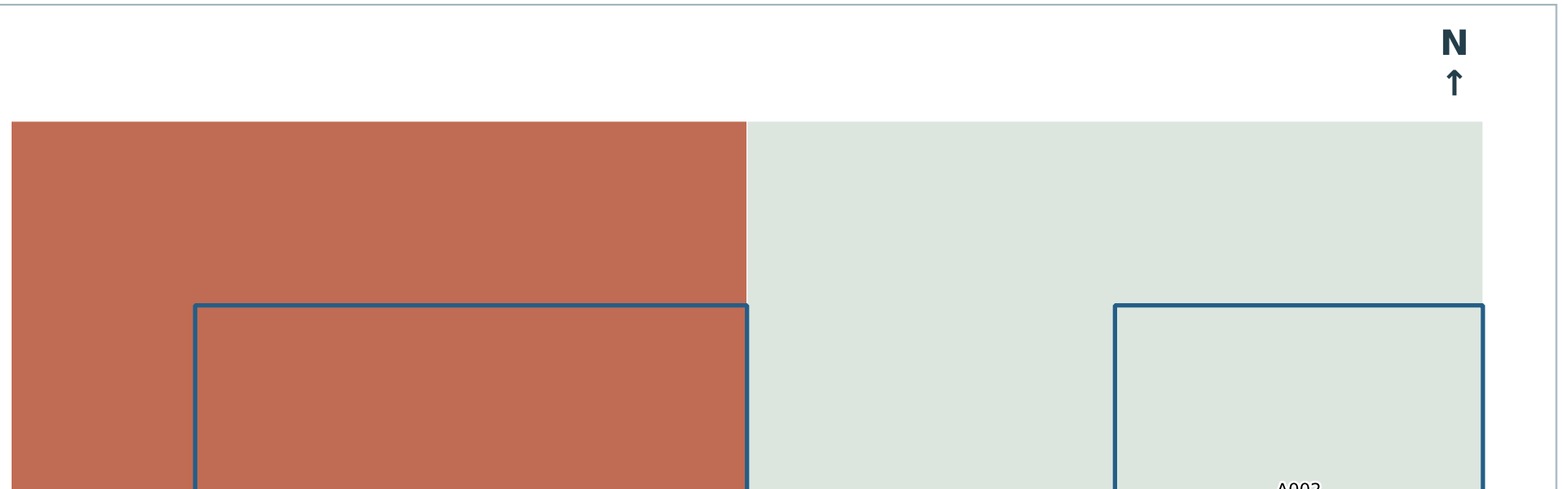

Scenario: SYNTHETIC_EVENT
Need threshold: ≥10 cm
Horizontal CRS: EPSG:32734
Grid: 10 × 10 m; source grid retained
Vertical datum: UNCONFIRMED
Rule profile: generic_unconfigured_v1
Run: DEMO_TRANSFERABLE_PLANNING
Source details: GeoPackage registers
Identify a feature for all rule decisions.

Synthetic inputs; all evidence and authority decisions are invented for software testing.

SYNTHETIC DEMONSTRATION · NOT A REAL STUDY-AREA RESULT

05 · Flood and heat planning context

Synthetic study area / SYNTHETIC_EVENT

Map key

Classification

- Documented heat-priority context
- Other documented heat class

READ THIS MAP

Explicit source heat classes.
Blue outlines: flood action areas.
Priority overlap is recorded for each flood action area.

This is baseline heat targeting.
No temperature reduction is claimed.
Thesis §§4.2, 5.7.4.

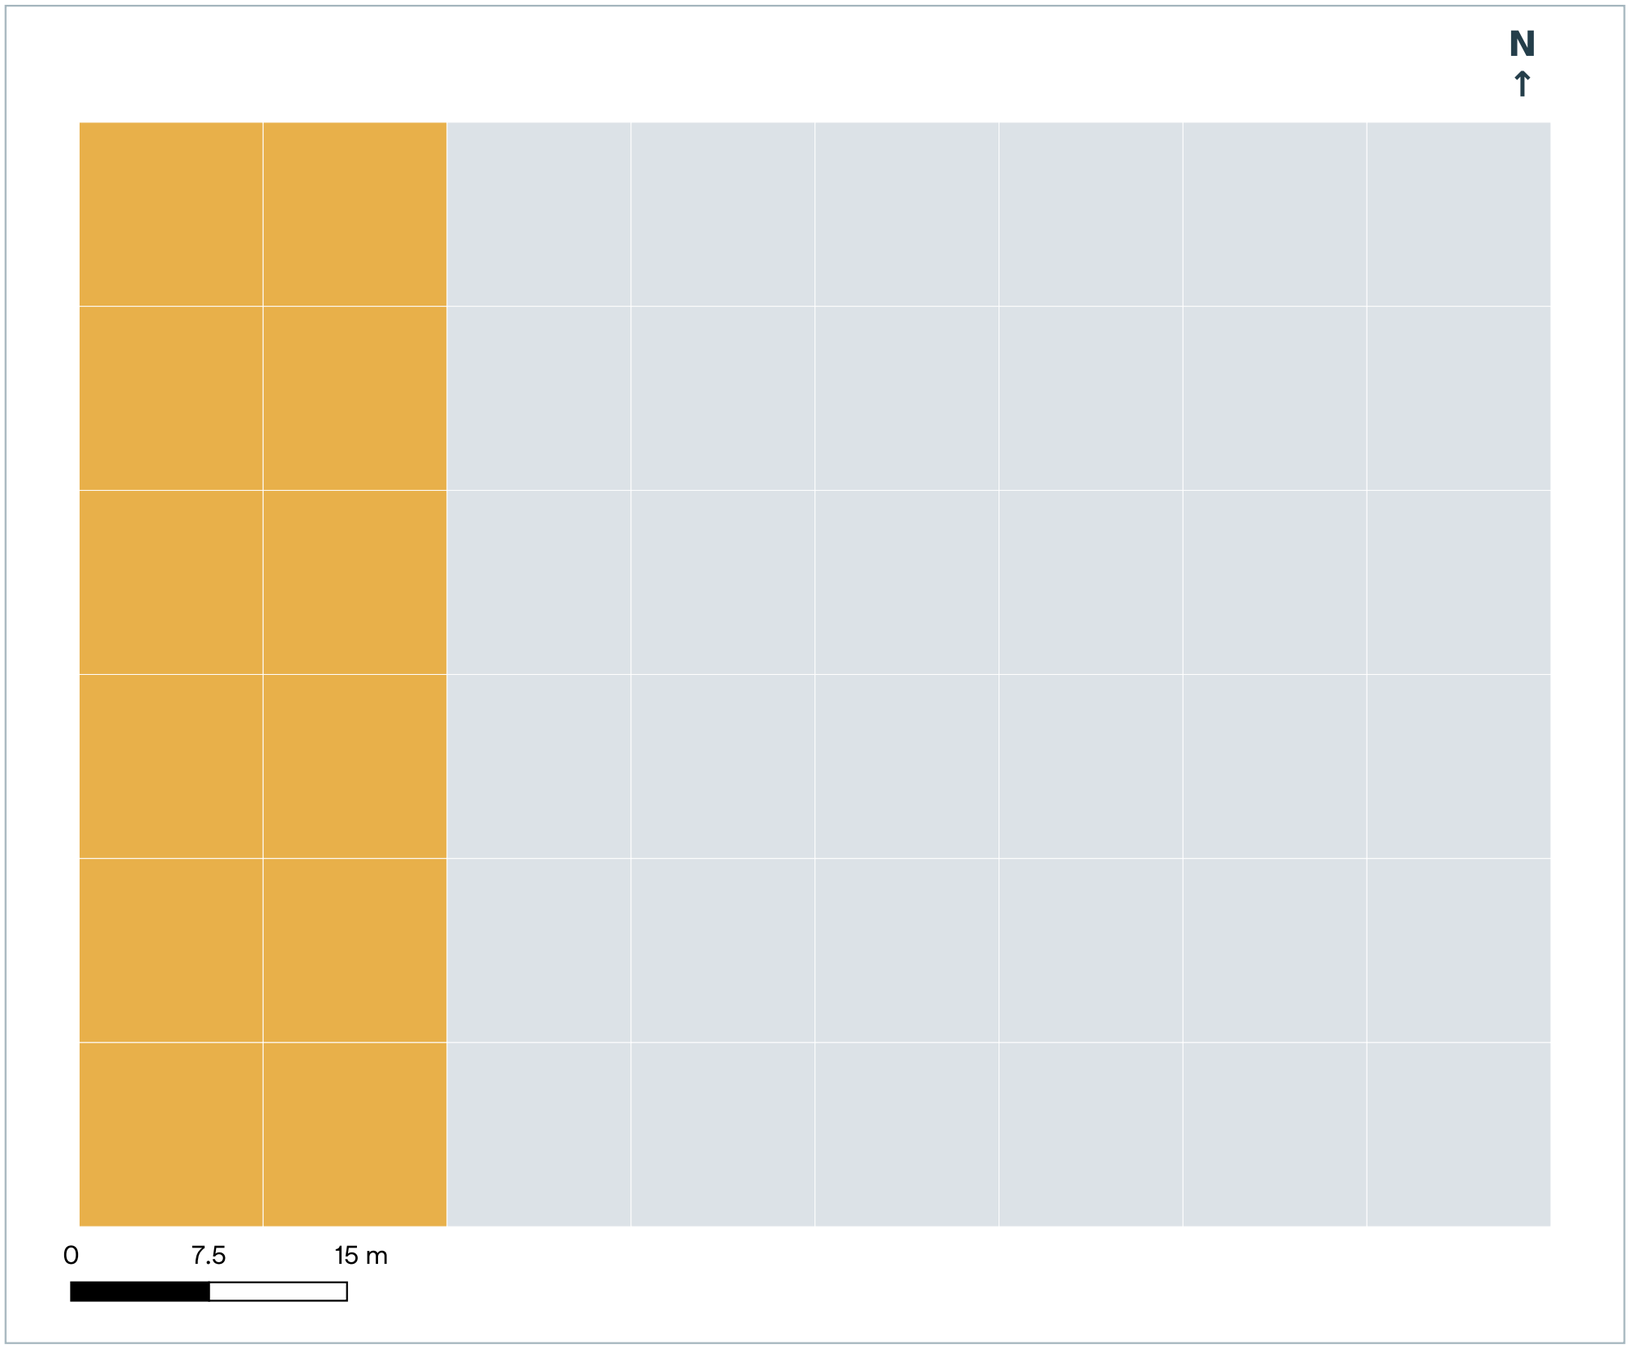

Scenario: SYNTHETIC_EVENT
Need threshold: ≥10 cm
Horizontal CRS: EPSG:32734
Grid: 10 × 10 m; source grid retained
Vertical datum: UNCONFIRMED
Rule profile: generic_unconfigured_v1
Run: DEMO_TRANSFERABLE_PLANNING
Source details: GeoPackage registers
Identify a feature for all rule decisions.

Synthetic inputs; all evidence and authority decisions are invented for software testing.

SYNTHETIC DEMONSTRATION · NOT A REAL STUDY-AREA RESULT

Roof retention / greening

Synthetic study area / SYNTHETIC_EVENT

Map key

Classification

- Investigate · conditional planning concept
- Recorded surface does not match

READ THIS MAP

Surface match identifies an investigation opportunity only.
All retained concepts are conditional.

Grey: incompatible recorded surface.
Purple: surface evidence missing.
Known infiltration FAIL is retained in the pathway field.
Thesis Table 4.2; §§5.5.1–5.5.4.

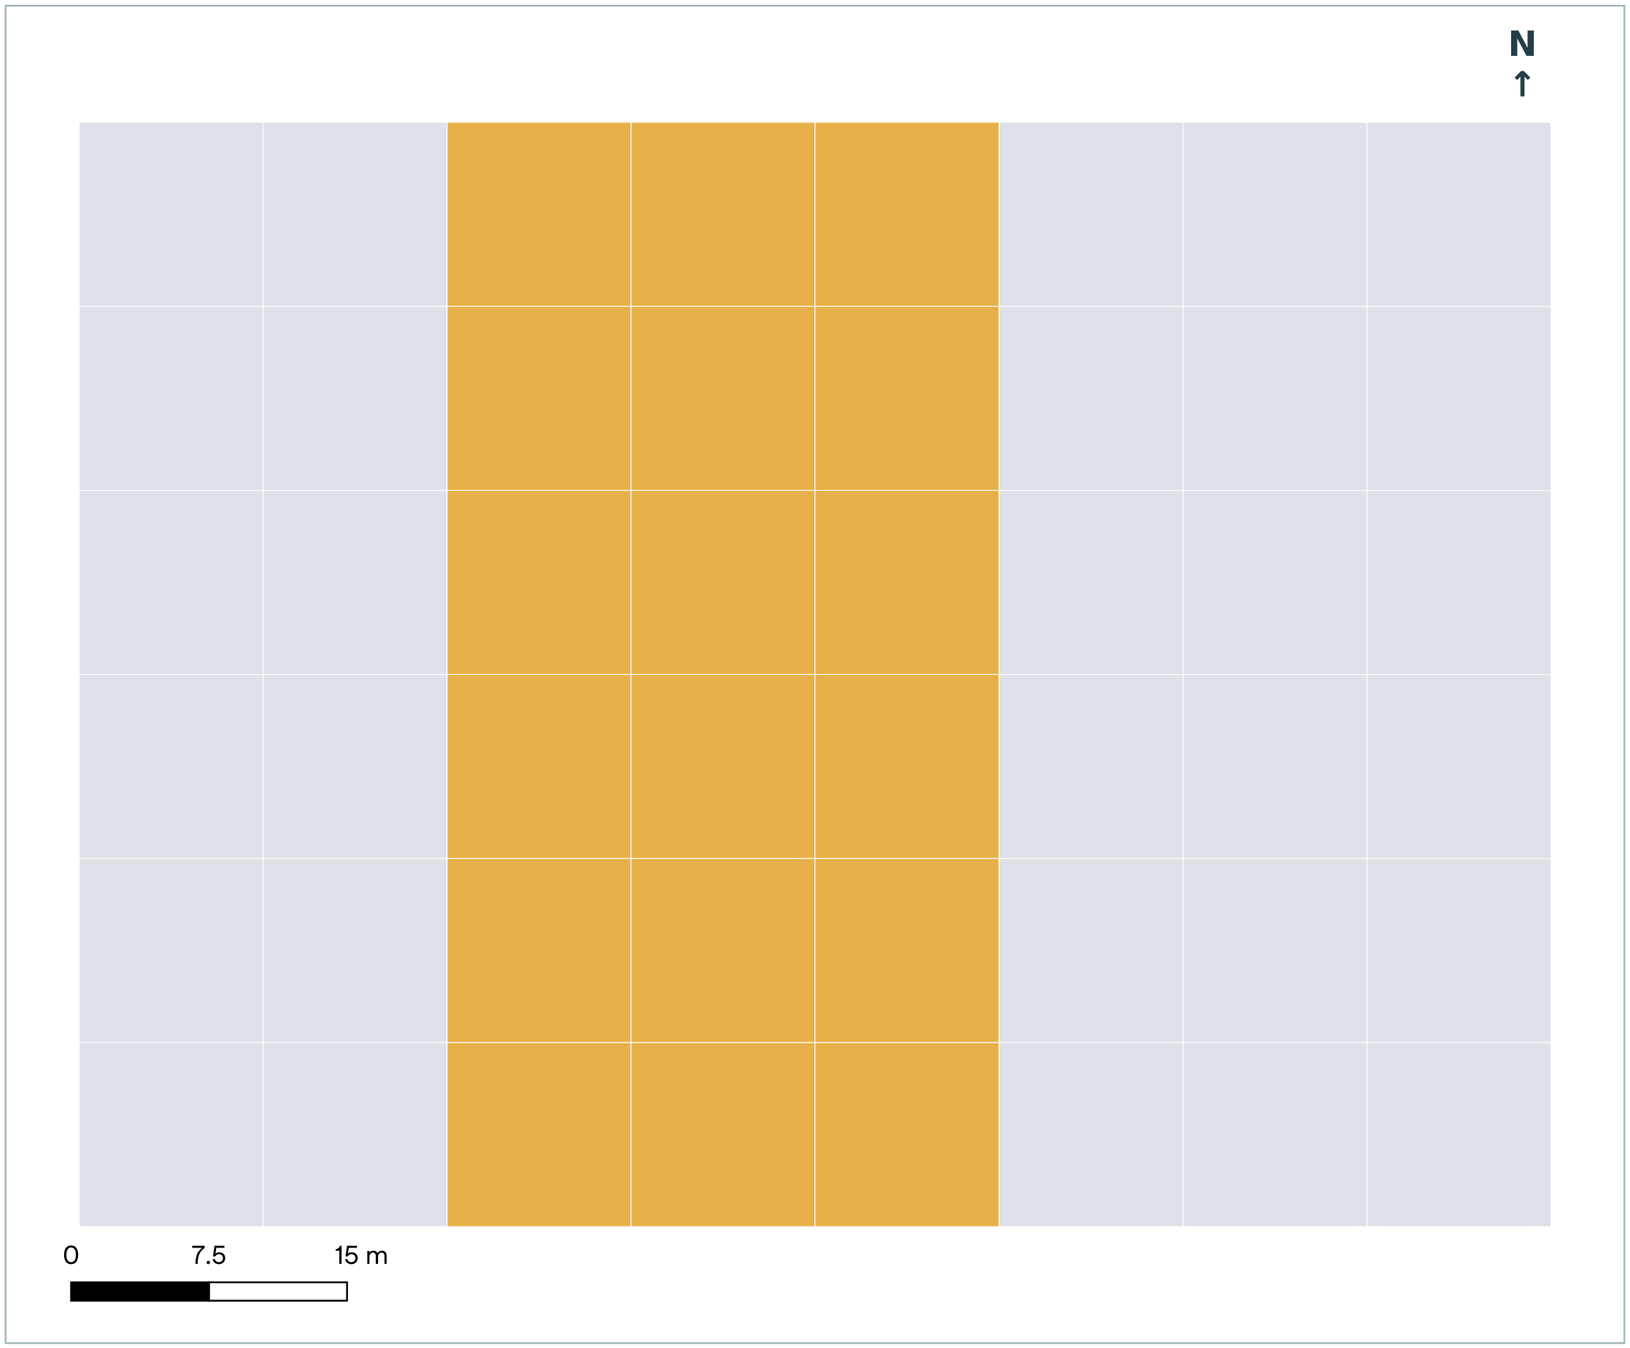

Scenario: SYNTHETIC_EVENT
Need threshold: ≥10 cm
Horizontal CRS: EPSG:32734
Grid: 10 × 10 m; source grid retained
Vertical datum: UNCONFIRMED
Rule profile: generic_unconfigured_v1
Run: DEMO_TRANSFERABLE_PLANNING
Source details: GeoPackage registers
Identify a feature for all rule decisions.

Synthetic inputs; all evidence and authority decisions are invented for software testing.

SYNTHETIC DEMONSTRATION · NOT A REAL STUDY-AREA RESULT

Rain gardens / planted detention

Synthetic study area / SYNTHETIC_EVENT

Map key

Classification

- Investigate · conditional planning concept
- Recorded surface does not match

READ THIS MAP

Surface match identifies an investigation opportunity only.
All retained concepts are conditional.

Grey: incompatible recorded surface.
Purple: surface evidence missing.
Known infiltration FAIL is retained in the pathway field.
Thesis Table 4.2; §§5.5.1–5.5.4.

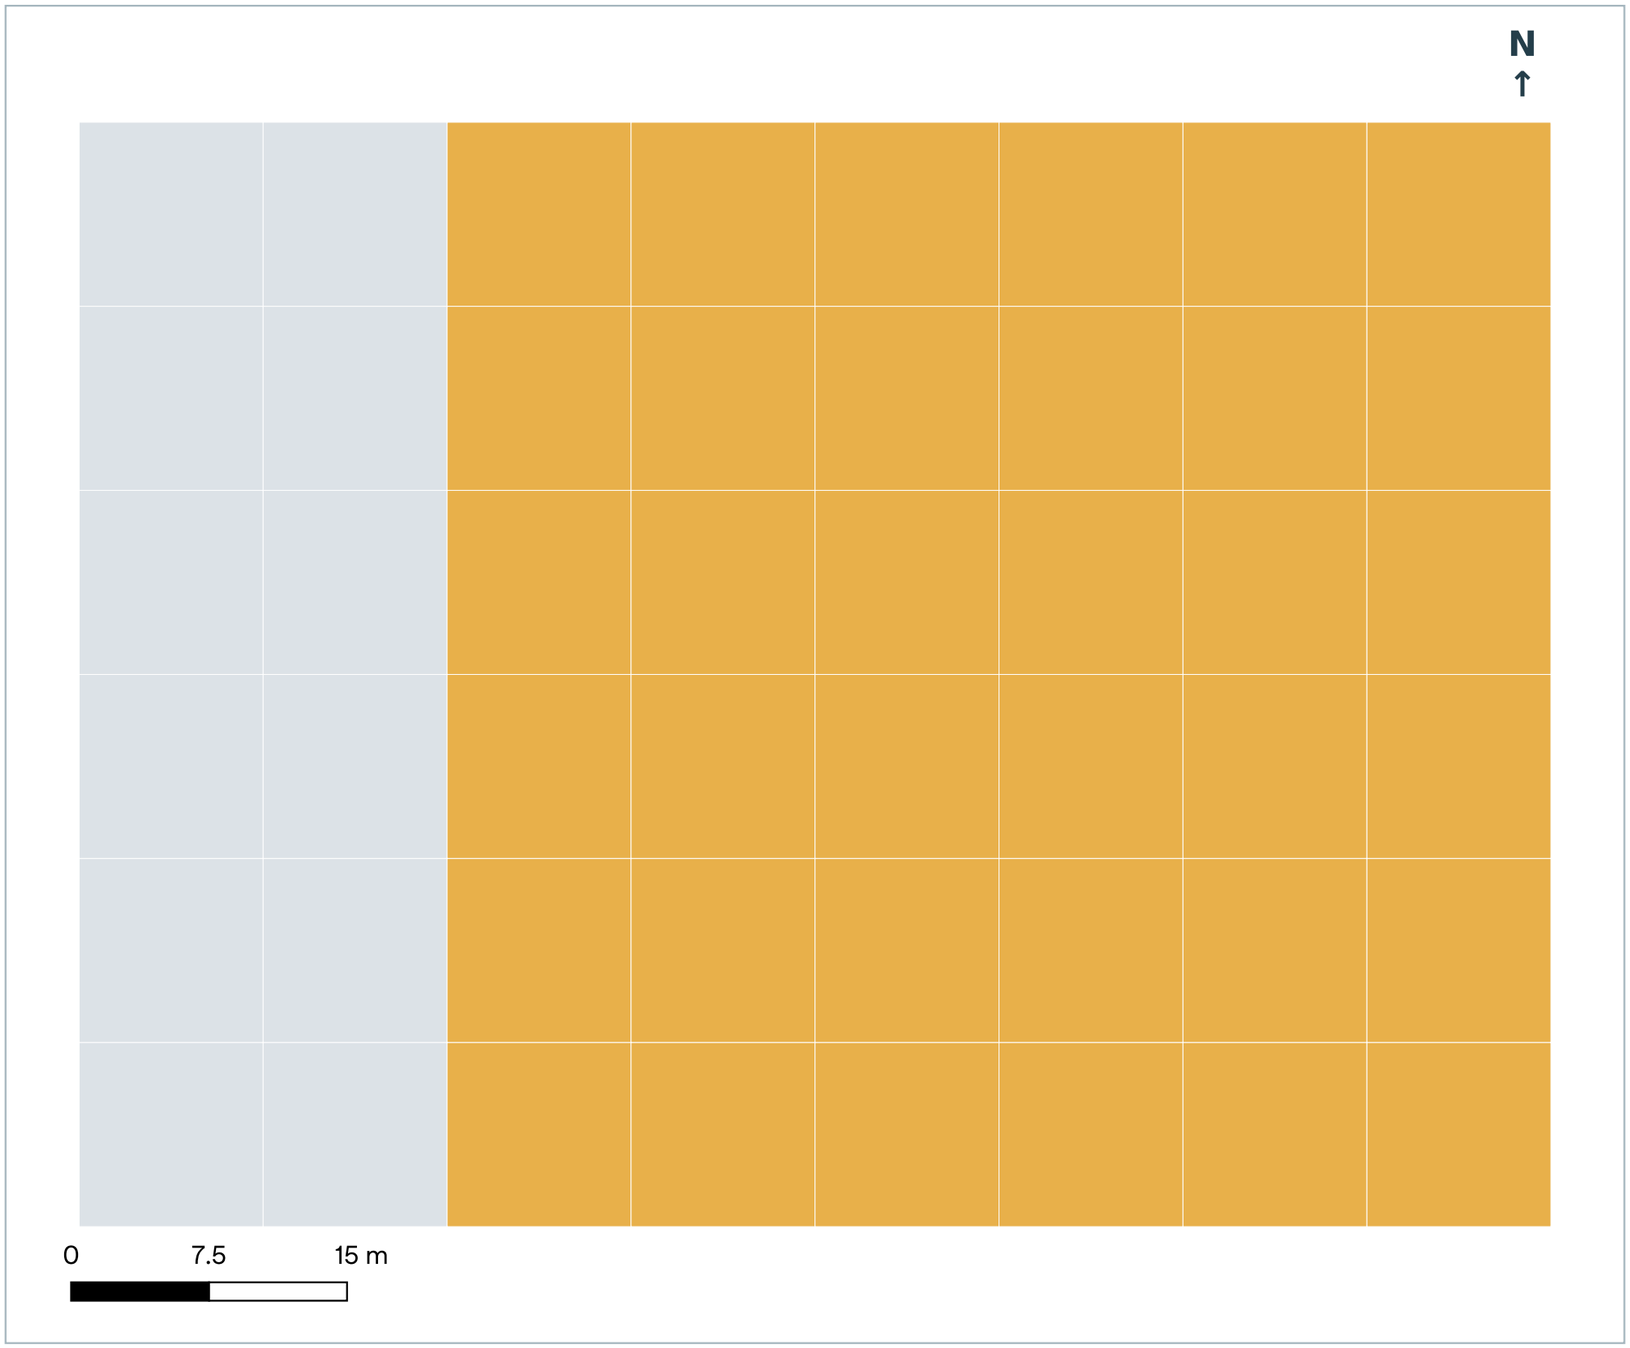

Scenario: SYNTHETIC_EVENT
Need threshold: ≥10 cm
Horizontal CRS: EPSG:32734
Grid: 10 × 10 m; source grid retained
Vertical datum: UNCONFIRMED
Rule profile: generic_unconfigured_v1
Run: DEMO_TRANSFERABLE_PLANNING
Source details: GeoPackage registers
Identify a feature for all rule decisions.

Synthetic inputs; all evidence and authority decisions are invented for software testing.

SYNTHETIC DEMONSTRATION · NOT A REAL STUDY-AREA RESULT

Water-sensitive trees / street retrofit

Synthetic study area / SYNTHETIC_EVENT

Map key

Classification

- Investigate · conditional planning concept
- Recorded surface does not match

READ THIS MAP

Surface match identifies an investigation opportunity only.
All retained concepts are conditional.

Grey: incompatible recorded surface.
Purple: surface evidence missing.
Known infiltration FAIL is retained in the pathway field.
Thesis Table 4.2; §§5.5.1–5.5.4.

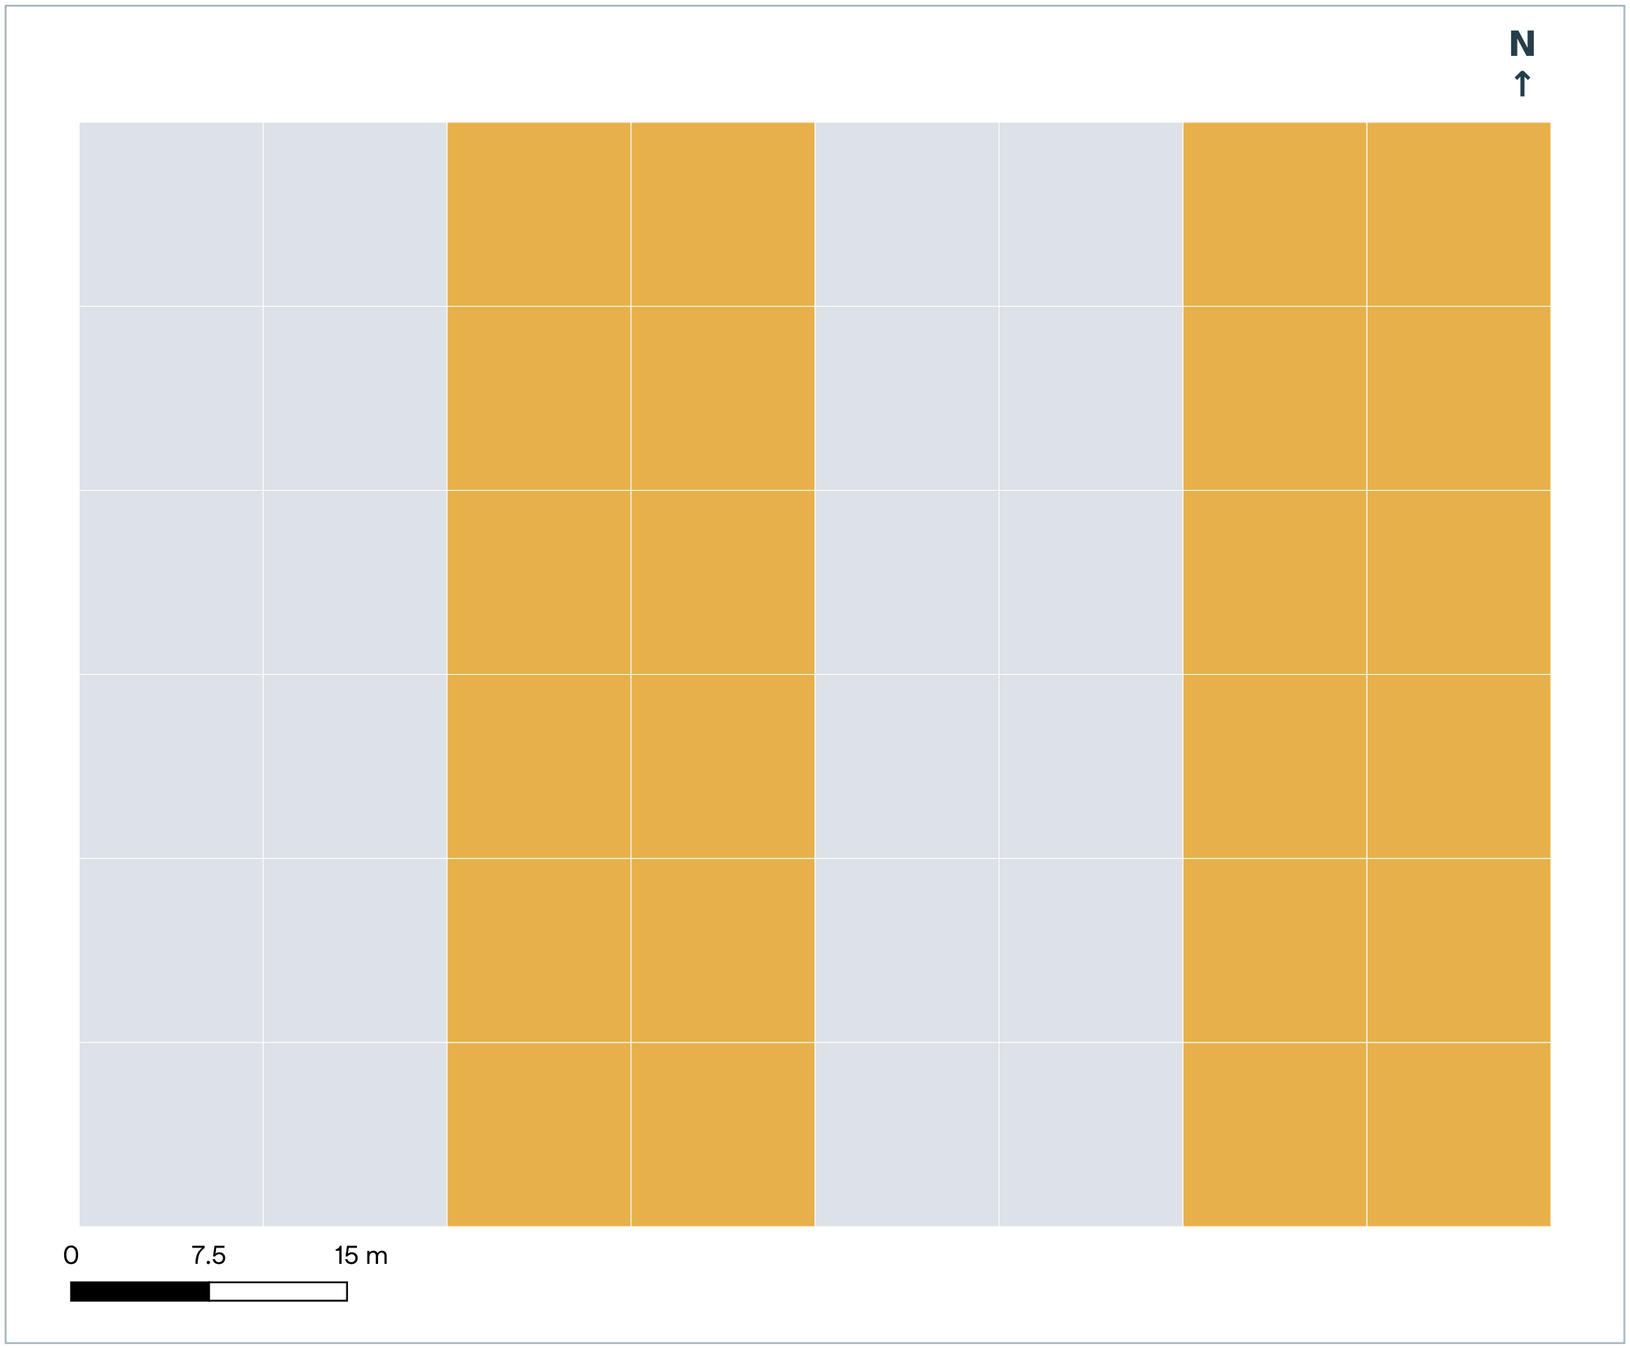

Scenario: SYNTHETIC_EVENT
Need threshold: ≥10 cm
Horizontal CRS: EPSG:32734
Grid: 10 × 10 m; source grid retained
Vertical datum: UNCONFIRMED
Rule profile: generic_unconfigured_v1
Run: DEMO_TRANSFERABLE_PLANNING
Source details: GeoPackage registers
Identify a feature for all rule decisions.

Synthetic inputs; all evidence and authority decisions are invented for software testing.

SYNTHETIC DEMONSTRATION · NOT A REAL STUDY-AREA RESULT

Multifunctional detention space

Synthetic study area / SYNTHETIC_EVENT

Map key

Classification

- Investigate · conditional planning concept
- Recorded surface does not match

READ THIS MAP

Surface match identifies an investigation opportunity only.
All retained concepts are conditional.

Grey: incompatible recorded surface.
Purple: surface evidence missing.
Known infiltration FAIL is retained in the pathway field.
Thesis Table 4.2; §§5.5.1–5.5.4.

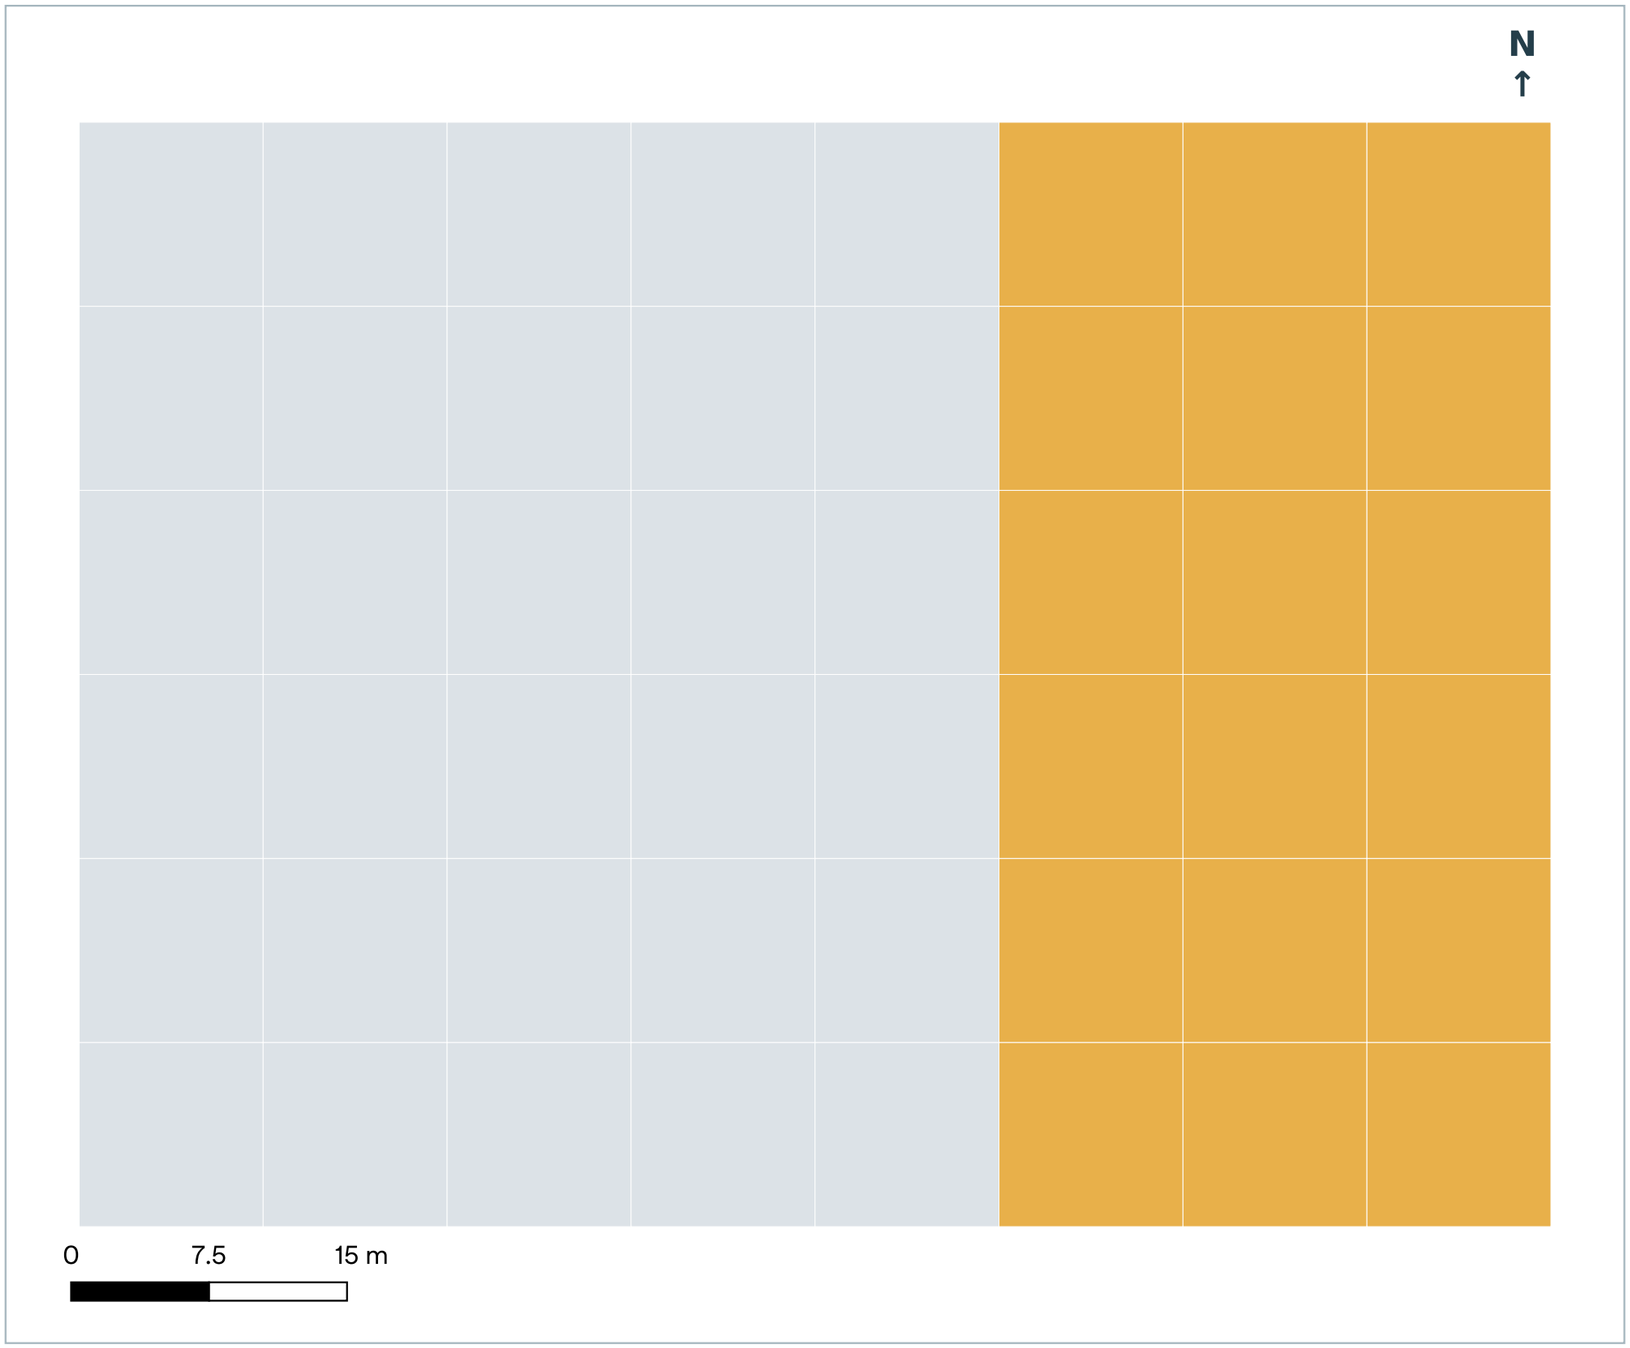

Scenario: SYNTHETIC_EVENT
Need threshold: ≥10 cm
Horizontal CRS: EPSG:32734
Grid: 10 × 10 m; source grid retained
Vertical datum: UNCONFIRMED
Rule profile: generic_unconfigured_v1
Run: DEMO_TRANSFERABLE_PLANNING
Source details: GeoPackage registers
Identify a feature for all rule decisions.

Synthetic inputs; all evidence and authority decisions are invented for software testing.

SYNTHETIC DEMONSTRATION · NOT A REAL STUDY-AREA RESULT

Permeable / underdrained surfaces

Synthetic study area / SYNTHETIC_EVENT

Map key

Classification

- Investigate · conditional planning concept
- Recorded surface does not match

READ THIS MAP

Surface match identifies an investigation opportunity only.
All retained concepts are conditional.

Grey: incompatible recorded surface.
Purple: surface evidence missing.
Known infiltration FAIL is retained in the pathway field.
Thesis Table 4.2; §§5.5.1–5.5.4.

Scenario: SYNTHETIC_EVENT
Need threshold: ≥10 cm
Horizontal CRS: EPSG:32734
Grid: 10 × 10 m; source grid retained
Vertical datum: UNCONFIRMED
Rule profile: generic_unconfigured_v1
Run: DEMO_TRANSFERABLE_PLANNING
Source details: GeoPackage registers
Identify a feature for all rule decisions.

Synthetic inputs; all evidence and authority decisions are invented for software testing.
